ATTENTION: SCIENCE TEACHERS AND LIBRARIANS

The Geological Survey of Alabama, in partnership with Dr. Jim Lacefield and the Alabama Museum of Natural History, is offering a free copy of Dr. Lacefield's book to schools and educators in Alabama. His book, entitled *Lost Worlds in Alabama Rocks—A Guide to the State's Ancient Life and Landscapes*, is an excellent resource designed to give the reader a guided tour through Alabama's diverse geologic history. Our mutual aim is to educate the public concerning Alabama and its resources, and one way to make this information more accessible to all is by offering Alabama schools a copy of Dr. Lacefield's book.

If you would like to receive a copy of this book for your school library or classroom, please send us your request on school letterhead to the Publications Office address shown below. As copies are limited, please reply at your earliest convenience.
